

Managing Products & Services

- [Products & Services Dictionary](#)
- [Products & Services Card](#)
- [Products & Services custom field in JIRA issue](#)

After installing plugin you will see new **Products & Services Dictionary** in JIRA. Products and services can be created either in the dictionary or in the JIRA issue using custom field with **Products & Services** type. **Products & Services Card** attributes can be configured by JIRA administrator as needed.
