Search Issues by Transactions

- Search for Issues with or without CRM Transactions
- Search for Issues with Thansactions by Conditions

Search for Issues with or without CRM Transactions

We can find issues with or without CRM transactions using next JQL query:

```
issuetype = Sale AND status = Delivering AND id not in transactionsIssues()
```

Search for Issues with Thansactions by Conditions

Use JQL id in TransactionsConditionalIssues("*condition*") for example:

```
id in TransactionsConditionalIssues("Status = plan AND Sum <= 5 000 AND Direction = expense")
```

As conditions you can use Transactions Attributes pared vith operator:

Attribute	Operator
Status	=
Sum	=,>,<, >=, <=
Direction	=
Reporter	=
Description	~
