

# CRM's Post-Functions

You can set post-functions based on CRM custom fields in workflow configurations:

Post-Function name	Description
<a href="#">CRM Issue Cloning Function</a>	CRM function to clone issue based on Conditions set in workflow's transition
<a href="#">CRM Copy Contacts to Users Postfunction</a>	Function to copy contacts from the issue company field to a users picker field
CRM copy field value function	CRM function to copy value from a CRM field to Jira field
