

Filtering and Colorizing Issues

Also you can add to your calendar **Filters** to highlight certain issues or/and temporarily hiding them on the calendar:

To hide issues which do not correspond to JQL in server version use "Hide" checkbox:

Name	Group	Only color	Hide	Set by Default	Color	
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<div><div></div></div>	Add
Anton	<input type="text"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<div><div></div></div>	JQL Delete
Project	<input type="text"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<div><div></div></div>	JQL Delete
Vladimir	<input type="text"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<div><div></div></div>	JQL Delete
Charles	<input type="text"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<div><div></div></div>	JQL Delete

Remove

Save Close

In cloud version all the filters hide issues not suitable to JQL by default. To change "Hide" filter to "Color" filter use checkbox "Only color":

You can:

- Set **Filters** to work by default (only server version).
- **Filters** can be used for the **"AND"** conditions, consistently filtering or highlighting certain data on the calendar:
