

Reminder for Jira 1.2.4 Home

Add-on allows you to set your own reminders to any JIRA issue you want. Reminder is the e-mail sent to user who created reminder in the issue.

To create new reminder enter the issue and click on 'Reminder' button:

The screenshot shows the 'Create a reminder' dialog box in the foreground. It has a title bar 'Create a reminder'. Inside, there is a 'When' field with the value '4/Apr/17 08:00 PM' and a calendar icon. Below it is a 'Message' text area containing the text 'Don't forget to contact Anton|'. A blue border highlights the message text area. Below the text area, it says 'A short optional reminder message'. At the bottom right of the dialog are 'Add' and 'Close' buttons. In the background, the Jira issue page is visible. It shows the user 'jiratst@yandex.ru' and buttons 'Vote for this issue' and 'Start watching this issue'. There is a timestamp '26/Dec/16 5:24 PM' and the word 'Yesterday'. Below that, there is a section 'My reminders' with buttons 'Reminder', 'Tonight', 'Tomorrow', 'In a week', and 'In month'. A red arrow points to the 'Reminder' button. Below the buttons, it says 'Upcoming reminders: No reminders'.

Select a date and time, the message is optional.

You can use 'Tonight', 'Tomorrow', 'In a week', 'In month' to create quick reminders without messages.

'In a week' adds 7 days to current date and time, 'In month' adds 1 month, the time stays the same as current moment.

'Tonight' and 'Tomorrow' time are configured in Reminders Settings menu under your avatar (Morning time for tomorrow and Evening time for tonight):
