Reset all settings to default

In the setting of the CRM (**Administration/Add-ons/CRM/Reset Data**) has 3 buttons:

1. **Delete all records and reset settings to default:** all your settings and records will be removed. And the initial settings.
2. **Delete all records:** delete all records of the following directories: Companies, Contacts, Products, Transactions. The directories that you have created, records will be saved.
3. **Reset CRM Cache:**CRM has a data cache for fast searching. It is used in transactions and exports. The button is needed to restore the cache if it has collapsed.
