

Release Notes

16 May 2023

- User permissions check improvements related to calendar loading.

19 Oct 2022

- Security improvements.
- Minor improvement: icon update.

18 Jul 2022

- Layout settings: Issue card's and preview's displaying is fixed.
- Card colors: JQL tips no longer interfere with the color palette display.

27 May 2022

- [Sharing calendars](#) functionality improvements ("Owner" type of role is added).
- Layout: Issue card and Issue preview lists do not include anymore fields that are not available for displaying.
- Calendars' list: deletion, duplication and wrong name appearing for available calendars in users' list are fixed.

16 May 2022

- Layout: Issue card and Issue preview lists do not include anymore fields that are not available for displaying.
- Calendars' list: deletion, duplication and wrong name appearing for available calendars in user's list are fixed.

15 Mar 2022

- Events, reminders and Google events are being hidden when quick filter is applied.
- Ability to set up 30 min lasting issue on Timeline Week is added. Minor visual improvements.
- "Add" button on Card Colors and Quick Filters sections is highlighted.
- Minor visual improvements.

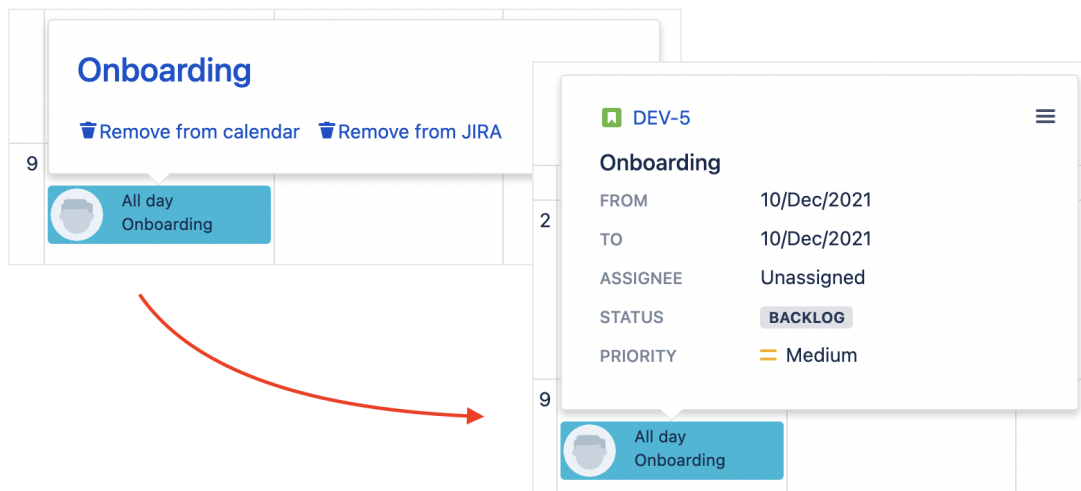

09 Dec 2021

New preview design and its default settings.

The following information is always displayed per issue, regardless of the issue preview settings:

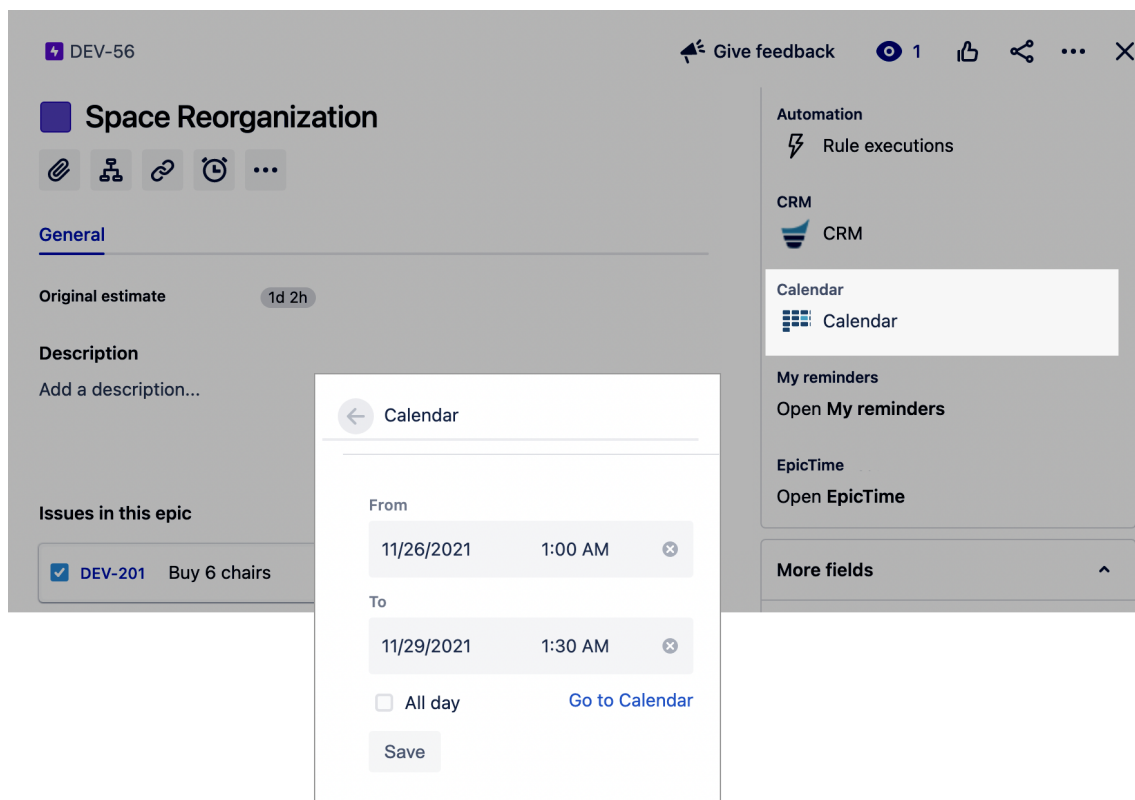

- Issue type
- Key
- Summary
- The fields the calendar is based on

Available actions are grouped into the handy menu.

22 Nov 2021

[Embedded dates](#) are available to base a calendar on. Those dates are preset in any project type in the special calendar section:

14 Oct 2021

- The underlying library was updated to the latest version.
- The resolved issues are now hidden from the [Unplanned Issues](#) menu by default.
- The *Edit Issues* project permission will be respected during planning.
- The Due Date system field is now available to base a calendar on. The *Schedule Issue* project permissions will be respected during planning.

30 Aug 2021

Fixed Bugs:

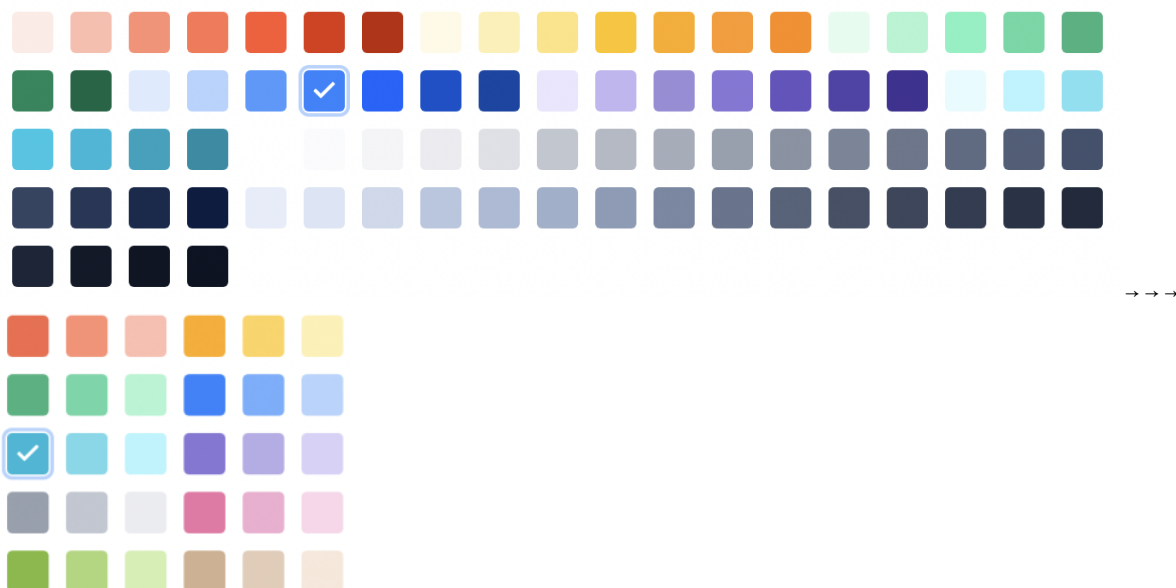

- The 1:00 PM option is unavailable in the Show Time setting.

- An error when trying to create a calendar while there are no saved filters in Jira.
- Issues put on the last day of the month are stretched for 30 days.
- Broken issue links in the List Week view.
- Unable to clear the filter by the assignee for unplanned issues.
- A JQL-query error in card color scheme entry leads to disabling card coloring.
- Infinite Calendar page loading in case of lack of the Reminder app permissions.
- Ability to select the same field as Start and Finish that leads to planning mistakes.
- Sent reminders displaying on the calendar.
- The End Date Field value cannot be cleared.
- Issue planned for the first calendar cell is not displayed.
- The app creates custom fields.
- Timeline Month displaying problem with enabled google calendar integration.
- Dragging issues within the all-day area puts them to the hourly grid.

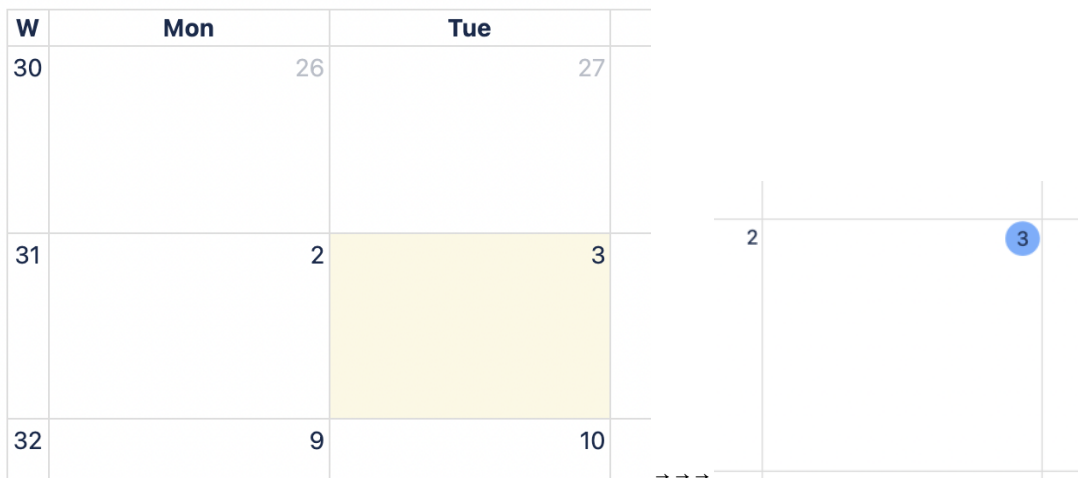

09 Aug 2021

Color schemes were improved and the relevant settings were simplified:

- text color for all entities is set by default and not required to be selected manually
- card colors were updated:

- unplanned issues have the default color
- the current day indicator was changed

- Reminders and Google events minor visual improvements

- The bug with color settings applied from the last to the first was fixed
- The color settings now allow prioritization

Color
Text Color

JQL
Add

Color
Text Color

JQL
Remove

→ → →

i You can drag color rules in order of importance. An issue will be colored by the first rule it matches on the list.

Color	Issues to apply (JQL)	
<input type="color"/>	<input checked="" type="checkbox"/> Enter valid JQL	Add
⋮ <input type="color"/>	<input checked="" type="checkbox"/> priority = Highest OR assignee = currentUser()	Remove
⋮ <input type="color"/>	<input checked="" type="checkbox"/> priority = High	Remove
⋮ <input type="color"/>	<input checked="" type="checkbox"/> priority = Low	Remove
<input type="color"/>	All remaining issues	

19 Jul 2021

- Single-date calendars are now available
- For calendars based on dates, the finish date now displayed as included (i. e. the issues with dates May 3th to May 4th will be displayed as a two-day event in a calendar)
- The app now doesn't create custom fields
- Minor improvements

21 May 2021

- Improved connection security
 - HSTS included
 - TLS version 1.2 is now used
- Fixed XSS vulnerability

01 Apr 2021

Bug with issue start/end dates incorrectly changing after issue expansion was fixed.

30 Mar 2021

- Month view: bug with issues moving to incorrect dates after page refresh was fixed.
- Bug with endless page loading after the only one calendar has been deleted was fixed.
- Assignee filter clear in "Unplanned issues" section was fixed.
- Bug with Calendar view is updated to default one after choosing quick filter was fixed.
- Assignee column in timeline views now contains only assignees who have issues in chosen period.
- List of assignees in assignee filter now displays only those users who have issues in chosen calendar period.
- List of all available options of fields added in JQL based settings was added.
- User access token expiration while Calendar using was fixed.
- Bug with assignees duplicating in timeline views was fixed.

- Bug with "Description" field display in "Issue card" and "Issue preview" was fixed.
- Name of shared calendar is now changing for all users who have access to the calendar if one was renamed.

29 Apr 2020

- [Reminders](#). Integration with the app [Reminder for Jira - Follow Up Issues](#).
- Availability to add additional [custom fields on events cards](#).
- Bug fixes.

20 Feb 2020

- Recurring [non-Jira events](#). Now you can schedule non-Jira events on a regular base.
- Pre-configured filters with resources (assignees) for calendar events.
- You can display more custom fields on events cards.

05 Nov 2019

- Permission scheme for calendars. Since implementation creator and admin would have permissions to customize calendars. Also, the creator could share permissions.
- Gadget for a dashboard.
- Ability to configure issues card.
- Custom Start and Finish dates for the calendar events.
- Onboarding for new users.

20 Aug 2019

You can drag-and-drop all unscheduled tasks on the calendar area and schedule them.
