

Adding Issues to Calendar

You can add a **new or existing issue** to a calendar. Simply select date and time in the calendar, and click on it. You can also **stretch the duration** of the issue.

 Changing of the duration an issue in the calendar will automatically update the **"Original Estimate"** field. The **"Original Estimate"** is calculated based on the length of the working day (in hours) and the working week (days) that are in your system settings JIRA (tab "Time Tracking"). Read more about Advanced [settings](#).
