

Non-JIRA Events

 Only server versions

Non-JIRA events can be added to calendar which can be seen only in calendar where they were created. Select one day or period you need and select "New non-JIRA event":

The event will be added to current calendar. It has only one attribute - Name, can be moved, stretched and trimmed by drag&drop and deleted permanently.

Event Set Up	Screenshot
--------------	------------

1. Event's name.
2. Event's background color.
3. Event's text color.
4. When checked the day/days of event is/are highlighted in selected event's background color, other issues and events can be placed at the selected days but the background will be coloured, not blank.

Wed 22 Aug	Thu 23 Aug
<div> admin 10:00 - 11:30 Lunch</div>	<div> Antonio Domingez SUP-52 00:00 - 23:59 I haven't got an emails</div>
<div> Antonio Domingez MAR-16 11:30 - 14:30 Review presentation with Team Issue Type: Sub-task</div>	<div>Issue Type: Bug</div>
<div> Antonio Domingez SUP-262 15:00 - 17:30 Translation switched off somehow Issue Type: Bug</div>	
<div> admin 17:30 - 19:00 Статус LMS 2.0</div>
