Reminder for Jira Cloud

Stay tuned on your issues. Create email-reminders on any issue for yourself and your coworkers. Set up text and periodicity.

Create reminders for any issue for yourself (option available for any user) and your colleagues (if you are granted the relevant rights). Set the notification text, time & periodicity. Manage the reminders you created and the reminders created for you in the convenient section.

Highlights:

- **Create a reminder right from an issue.** Create a new reminder from an issue and specify the message, time and periodicity (if required).
- **Browse and manage your reminders in one place.** Use the 'My Reminders' menu to browse and manage reminders created by you and for you.
- **Admin: manage all reminders in one list.** Let your Jira Admin browse the queues of reminders and the reminders archive within the special section.
- **Consider time zones.** A user will see the reminder dispatch date in accordance with their account time zone.
